Delphi Developer

Description

The Delphi multi-tiered desktop Application Developer supports the client's mission by developing quality software within a structured and mature software development life-cycle environment, preferably an agile development environment.

This position works closely with the customer and team members, especially the Functional Analyst, SQA, and other developers to ensure that modifications and enhancements to existing software and development of new software products provide efficient and effective solutions for the customer. The applicant for this position will be involved in all aspects of application development, including analysis, requirements documentation, design, development and test site deployment and issue tracking and resolution.

The applicant will work closely and take direction from the lead Delphi Developer as well as the Project Manager.

Education

Bachelor's (or higher) in Computer Science or similar field of study with an application development focus preferred.

Experience

3 years, or 5 years of additional relevant experience may be substituted for education.

Responsibilities

- Designing, developing, testing, deploying software.
- Defect resolution and issue tracking.
- Development of new functionality as well as modification to existing applications.
- Participating in agile development life-cycle to include daily scrum calls, sprint planning and build planning.
- Assisting and working with other Delphi developers as well as Mumps developers.
- Work in Jira to track and update status on work activities.

Qualifications

- The applicant must possess written and verbal communication skills required to work with team members and assist with documentation to include but not limited to software documentation, work activities, issue tracking, technical manuals, and other work processes.
- Has high standards, results oriented, and a commitment to delivering high quality production time
- Although rarely required, applicants must also be willing to travel occasionally.

Preferred Qualifications:

Hiring organization

ThunderYard Solutions

Employment Type

Full-time

Job Location

505 N John Rodes Blvd, 32934,
Melbourne, FL, USA
