Ruby Software Developer for API

Description
We are seeking a talented Ruby Software Developer to help us both create and maintain APIs consumed by first and third-party apps and services to positively impact the lives of millions of Americans. We need a creative engineer with experience developing high-quality products on schedule, strong communication and collaboration skills, and a passion for innovation. In this role you will be responsible for designing and implementing new cloud-based RESTful APIs, as well as essential work maintaining existing software libraries.

Education
Bachelor's Degree or higher in a business or technical discipline

Experience
6 years, or 10 years of additional relevant experience may be substituted for education

Responsibilities

- Participate in requirements analysis
- Collaborate with internal teams to produce software design and architecture
- Participate in Agile SCRUM ceremonies including Story Point Estimation, Backlog Grooming, Sprint/Release Planning, Reviews, and Retrospectives
- Write clean, scalable code based on requirements and design
- Unit Test and deploy applications and systems
- Revise, update, refactor and debug code
- Improve existing software
- Develop documentation throughout the software development life cycle (SDLC)

Qualifications
Minimum Qualifications:

- Proven track record as a developer or in school projects
- Working knowledge of API development
- Excellent knowledge and experience working with Ruby
- Familiarity with architecture styles/APIs (SOAP, REST, RPC)
- Excellent analytical and organization skills
- Familiarity with modern source control systems, such as Git
- An ability to understand front-end users' requirements and a problem-solving attitude
- Excellent verbal and written communication skills

Preferred Qualifications:

- Working knowledge of RSpec, Rails, and SQL
- Experience with containerization technologies (e.g., Docker) and Cloud Service Providers (e.g., AWS)
- VA or other Federal Government experience
